#### **Table of Contents**

#### **About this Book**

Why Read This Book?

What You Need

Organization of This Book

Conventions used in This Book

# **Building the Tutorials**

#### **I. The Basics**

# **Introduction**

1. Hello, Triangle!

2. Playing with Colors

## **II.** Positioning

- 3. OpenGL's Moving Triangle
- 4. Objects at Rest
- 5. Objects in Depth
- 6. Objects in Motion
- 7. World in Motion
- 8. Getting Oriented

#### **III. Illumination**

- 9. Lights On
- 10. Plane Lights
- 11. Shinies
- 12. Dynamic Range
- 13. Lies and Impostors

#### IV. Texturing

- 14. Textures are not Pictures
- 15. Many Images

## 16. Gamma and Textures

17. Spotlight on Textures

## V. Framebuffer

# VI. Advanced Lighting

# A. Basic Optimization

**Vertex Format** 

**Textures** 

**Object Optimizations** 

Finding the Bottleneck

Vertex Format

**Synchronization** 

# B. Further Study

**Debugging** 

**Topics of Interest** 

# C. History of PC Graphics Hardware

Voodoo Magic

**Dynamite Combiners** 

<u>Vertices and Registers</u>

**Programming at Last** 

<u>Dependency</u>

**Modern Unification** 

## D. Getting Started with OpenGL

## Manual Usage

## **List of Figures**

- 1. Position Vectors
- 2. <u>Direction Vectors</u>
- 3. <u>Vector Addition</u>
- 4. Vector Addition Head-to-Tail
- 5. <u>Vector Negation</u>
- 6. Vector Subtraction
- 7. Vector Scaling
- 8. An Image
- 9. Normalized Device Coordinate Space
- 10. Scan Converted Triangle
- 11. Shared Edge Scan Conversion
- 1.1. Data Flow to Vertex Shader
- 1.2. Data Flow to Rasterizer
- 2.1. Fragment Position
- 2.2. Vertex Array Memory Map
- 2.3. Multiple Vertex Attributes
- 2.4. Interpolated Vertex Colors

- 4.1. Triangle Winding Order
- 4.2. Orthographic Prism
- 4.3. 2D to 1D Orthographic Projection
- 4.4. 2D to 1D Perspective Projection
- 4.5. <u>Viewing Frustum</u>
- 4.6. 2D to 1D Perspective Projection Diagram
- 4.7. Camera to NDC Transformation in 2D
- 4.8. <u>Perspective Prism</u>
- 4.9. Perspective Matrix
- 4.10. Bad Aspect Ratio
- 4.11. Widescreen Aspect Ratio Frustum
- 5.1. Overlapping Objects
- 5.2. Three Overlapping Triangles
- 5.3. Depth Buffering
- 5.4. Mild Overlap
- 5.5. Major Overlap
- 5.6. Triangle Clipping
- 5.7. Near Plane Clipping
- 5.8. Depth Clamping
- 5.9. <u>Depth Clamp With Overlap</u>
- 6.1. Two 2D Coordinate Systems
- 6.2. Coordinate System Translation in 2D
- 6.3. <u>Translation Project</u>
- 6.4. Coordinate System Scaling in 2D
- 6.5. Scale Project
- 6.6. Coordinate Rotation in 2D
- 6.7. Rotation Project
- 6.8. <u>Transform Order Diagram</u>
- 6.9. Hierarchy Project
- 7.1. Full Vertex Transformation Pipeline
- 7.2. World Space Scene
- 7.3. Spherical Coordinates
- 7.4. <u>Triangle Fan</u>
- 7.5. <u>Triangle Strip</u>
- 7.6. <u>Triangle Strips with Winding Order</u>
- 7.7. Uniform Buffer and Block Binding Points
- 8.1. Gimbal Lock Project
- 8.2. Parallel Gimbals
- 8.3. Quaternion YPR Project
- 8.4. Camera Relative Project
- 8.5. Interpolation Directions
- 9.1. Surface Light Absorption
- 9.2. Perpendicular Light
- 9.3. Light at an Angle
- 9.4. Diffuse Reflectance
- 9.5. Near and Far Lights
- 9.6. Basic Lighting
- 9.7. Circle Scaling
- 9.8. Circle Scaling with Normals

- 9.9. <u>Lighting and Scale</u>
- 9.10. Half Lit
- 9.11. Ambient Lighting
- 9.12. <u>Cube Position Topology</u>
- 9.13. <u>Cube Normal Topology</u>
- 9.14. Full Cube Topology
- 10.1. Vertex Point Lighting
- 10.2. Light Near Surface
- 10.3. <u>Triangle Interpolation</u>
- 10.4. <u>Triangle Edge Interpolation</u>
- 10.5. Two Triangle Quadrilateral
- 10.6. <u>Two Triangle Interpolation</u>
- 10.7. Fragment Point Lighting
- 10.8. Close Lit Cylinder
- 10.9. Adjacent Gradient
- 10.10. Gradient Intensity Plot
- 10.11. <u>High Light</u>
- 10.12. Fragment Attenuation
- 11.1. Perfect Specular Reflection
- 11.2. Smooth and Rough Microfacets
- 11.3. Phong Lighting
- 11.4. Phong with Dark Diffuse
- 11.5. Phong Clipping
- 11.6. Phong Distortion
- 11.7. Large View and Reflect Angle
- 11.8. Geometric Half-Angle Vector
- 11.9. Perfect Reflection Half-Angle Vector
- 11.10. Blinn Lighting
- 11.11. Blinn vs. Phong Lighting
- 11.12. <u>Light Edge</u>
- 11.13. Improved Light Edge
- 11.14. Gaussian Probability Distribution Curves
- 11.15. Gaussian with Sharp Highlight
- 12.1. Scene Lighting
- 12.2. Darkness, Day vs. Night
- 12.3. Light Clipping
- 12.4. HDR Lighting
- 12.5. Gamma Function Graph
- 12.6. Gamma Correction
- 12.7. Gamma Lighting
- 12.8. Gamma Shadow Details
- 13.1. Basic Impostor
- 13.2. Circle Point Computation
- 13.3. Bad Impostor
- 13.4. <u>Circle Projection</u>
- 13.5. <u>Bad vs. Good</u>
- 13.6. Bad Intersection
- 13.7. <u>Depth Correct Impostor</u>
- 14.1. Basic Texture

- 14.2. <u>Texture Binding and Context</u>
- 14.3. Sampler Binding and Context
- 14.4. Projection and Interpolation
- 14.5. Perspective Correct Interpolation
- 14.6. Material Texture
- 14.7. <u>A Torus</u>
- 14.8. Surface smudges
- 15.1. Basic Checkerboard Plane
- 15.2. <u>Jagged Texture Edge</u>
- 15.3. Nearest Sampling
- 15.4. Linear Filtering
- 15.5. Large Minification Sampling
- 15.6. Mipmapped Minification Sampling
- 15.7. Hallway with Mipmapping
- 15.8. Hallway with Special Texture
- 15.9. Linear Mipmap Linear Comparison
- 15.10. Main Diagonal
- 15.11. Long Fragment Area
- 15.12. Long Fragment with Sample Area
- 15.13. Parallelogram Sample Area
- 15.14. Anisotropic Filtering
- 15.15. Max Anisotropic Filtering
- 16.1. Gamma Ramp
- 16.2. Gamma Ramp with sRGB Images
- 16.3. Gamma Checkers
- 16.4. Gamma Correct with Gamma Mipmaps
- 16.5. Gamma Landscape
- 17.1. <u>Double Projection</u>
- 17.2. Top View Projection
- 17.3. Near View Projection
- 17.4. Projected Light
- 17.5. Back Projected Light
- 17.6. Colored Spotlight
- 17.7. Edge Clamped Light
- 17.8. Border Clamped Light
- 17.9. Cube Map Face Orientation
- 17.10. Cube Point Light

# **List of Tables**

- 6.1. <u>Hierarchy Tutorial Key Commands</u>
- 7.1. World Space Controls
- 10.1. <u>Transform Legend</u>
- 12.1. Scene Lighting Values
- 13.1. Sphere Impostor Control Key Map

#### **List of Examples**

- 1.1. The display Function
- 1.2. Buffer Object Initialization

- 1.3. Vertex Shader
- 1.4. Reshaping Window
- 1.5. Fragment Shader
- 1.6. Program Initialization
- 1.7. Shader Creation
- 1.8. Program Creation
- 2.1. FragPosition's Fragment Shader
- 2.2. New Vertex Array Data
- 2.3. Buffer Object Initialization
- 2.4. Rendering the Scene
- 2.5. Vertex Arrays
- 2.6. <u>Draw Arrays Implementation</u>
- 2.7. Multi-input Vertex Shader
- 2.8. Fragment Shader with Input
- 3.1. Computation of Position Offsets
- 3.2. Adjusting the Vertex Data
- 3.3. <u>Updating and Drawing the Vertex Data</u>
- 3.4. Offsetting Vertex Shader
- 3.5. Draw with Calculated Offsets
- 3.6. Offset Computing Vertex Shader
- 3.7. Rendering with Time
- 3.8. Loop Duration Setting
- 3.9. Time-based Fragment Shader
- 3.10. More Shader Creation
- 4.1. <u>Face Culling Initialization</u>
- 4.2. ManualPerspective Vertex Shader
- 4.3. Program Initialization
- 4.4. MatrixPerspective Vertex Shader
- 4.5. Program Initialization of Perspective Matrix
- 4.6. Square-only Viewport
- 4.7. Reshape with Aspect Ratio
- 5.1. <u>Draw Arrays Implementation</u>
- 5.2. <u>Draw Elements Implementation</u>
- 5.3. VAO Initialization
- 5.4. VAO and Indexed Rendering Code
- 5.5. Vertex Attribute Data Abridged
- 5.6. Array Drawing of Two Objects with One VAO
- 5.7. MultiObject Element Buffer
- 5.8. <u>Base Vertex Single VAO</u>
- 5.9. Base Vertex Rendering
- 5.10. Depth Buffer Setup
- 5.11. Depth Buffer Clearing
- 5.12. Depth Clamping On/Off
- 6.1. Translation Shader Initialization
- 6.2. Frustum Scale Computation
- 6.3. Translation Matrix Generation
- 6.4. Rotation Transformation Building
- 6.5. <u>Hierarchy::Draw</u>
- 7.1. Window Resizing

- 7.2. Position-only Vertex Shader
- 7.3. Upload World to Camera Matrix
- 7.4. Spherical to Euclidean Transform
- 7.5. Draw the Ground
- 7.6. <u>DrawForest Function</u>
- 7.7. Call to DrawParthenon
- 7.8. <u>Draw Camera Target</u>
- 7.9. Cylinder Mesh File
- 7.10. UBO-based Vertex Shader
- 7.11. <u>Uniform Buffer Creation</u>
- 7.12. UBO-based Perspective Matrix
- 7.13. UBO-based Camera Matrix
- 7.14. Viewing Point with UBO
- 8.1. Gimbal Lock Display Code
- 8.2. Quaternion YPR Display
- 8.3. OffsetOrientation Function
- 8.4. <u>Camera Relative OffsetOrientation</u>
- 8.5. <u>Quaternion Linear Interpolation</u>
- 8.6. Spherical Linear Interpolation
- 9.1. <u>Display Camera Code</u>
- 9.2. Ground Plane Lighting
- 9.3. Cylinder Lighting
- 9.4. Lighting Vertex Shader
- 9.5. <u>Lighting with Proper Normal Transform</u>
- 9.6. Ambient Vertex Lighting
- 9.7. <u>Lighting Intensity Settings</u>
- 10.1. Per-Vertex Point Light Rendering
- 10.2. Per-Vertex Point Light Vertex Shader
- 10.3. Initial Per-Fragment Rendering
- 10.4. Ground Plane Per-Fragment Rendering
- 10.5. Model Space Per-Vertex Lighting Vertex Shader
- 10.6. Model Space Per-Fragment Lighting Vertex Shader
- 10.7. Per-Fragment Lighting Fragment Shader
- 10.8. Light Attenuation Fragment Shader Definitions
- 10.9. Window to Camera Space Function
- 10.10. Light Intensity Application Function
- 10.11. Main Light Attenuation
- 11.1. Phong Lighting Shader
- 11.2. Blinn-Phong Lighting Shader
- 11.3. Gaussian Lighting Shader
- 12.1. Material Uniform Block
- 12.2. Material UBO Construction
- 12.3. Daytime Lighting
- 12.4. Light Uniform Block
- 12.5. Many Lights Main Function
- 12.6. HDR LightBlock
- 12.7. Gamma LightBlock
- 12.8. Fragment Gamma Correction
- 13.1. Basic Impostor Vertex Shader

- 13.2. <u>Basic Impostor Fragment Shader</u>
- 13.3. Ray Traced Impostor Square
- 13.4. <u>Depth Correct Fragment Shader</u>
- 13.5. Impostor Geometry Creation
- 13.6. Vertex Shader for Points
- 13.7. Geometry Shader Definitions
- 13.8. Geometry Shader Vertex Computation
- 13.9. Fragment Shader Changes
- 14.1. BuildGaussianData function
- 14.2. <u>CreateGaussianTexture function</u>
- 14.3. Shader Texture Access
- 14.4. Sampler Object Creation
- 14.5. BuildGaussianData in 2D
- 14.6. CreateGaussianTexture in 2D
- 14.7. <u>CreateShininessTexture function</u>
- 14.8. Shininess Texture Access
- 14.9. Gaussian Texture with Specular
- 15.1. DDS Texture Loading with Mipmaps
- 15.2. Special Texture Data
- 16.1. sRGB Image Format
- 16.2. Window to Clip Matrix Computation
- 16.3. Vertex Format
- 16.4. Gamma Landscape defaults Function
- 16.5. Enable sRGB Conversion
- 17.1. Scene Graph Shader Definition
- 17.2. Scene Graph Node Definition
- 17.3. <u>Double Projection LoadAndSetupScene</u>
- 17.4. Left Projection Matrix
- 17.5. Right Projection Matrix
- 17.6. View Camera to Projected Texture Transform
- 17.7. Border Clamp Sampler Objects
- 17.8. Cube Texture Loading
- 17.9. View Camera to Light Cube Texture

#### **List of Equations**

- 1. Vector Addition with Numbers
- 2. Vector Negation
- 3. Vector Multiplication
- 4. Vector-Scalar Multiplication
- 5. Vector-Scalar Addition
- 6. Vector Algebra
- 7. <u>Vector Length</u>
- 8. Vector Normalization
- 4.1. Perspective Computation
- 4.2. <u>Depth Computation</u>
- 4.3. Camera to Clip Equations
- 4.4. Camera to Clip Expanded Equations
- 4.5. Camera to Clip Matrix Transformation
- 4.6. Vector Matrix Multiplication

- 5.1. Perspective Computation
- 6.1. Coordinate System
- 6.2. Identity Matrix
- 6.3. <u>Translation Matrix</u>
- 6.4. <u>Scaling Transformation Matrix</u>
- 6.5. Vectorized Matrix Multiplication
- 6.6. Axial Rotation Matrices
- 6.7. Angle/Axis Rotation Matrix
- 6.8. Order of Transformation
- 8.1. Angle/Axis to Quaternion
- 8.2. Quaternion Multiplication
- 8.3. Quaternion to Matrix
- 9.1. <u>Diffuse Lighting Equation</u>
- 9.2. Dot Product
- 9.3. Dot Product from Vector Math
- 9.4. Matrix Transpose
- 10.1. Physical Light Attenuation
- 10.2. <u>Light Attenuation Inverse</u>
- 10.3. Camera to Window Transforms
- 10.4. Window to Camera Transforms
- 11.1. Phong Specular Term
- 11.2. Vector Reflection
- 11.3. Half-Angle Vector
- 11.4. Blinn Specular Term
- 11.5. Gaussian Distribution Function
- 11.6. Gaussian Specular Term
- 12.1. <u>Display Gamma Function</u>
- 12.2. Gamma Correction Function
- 13.1. Ray Equation
- 13.2. Sphere Equation
- 14.1. Gaussian as Function of One Variable
